

CONSENT OF NON-SECURE FORMS OF ELECTRONIC COMMUNICATIONS

Electronic communication (email, text message) while convenient, are typically not encrypted and are inherently insecure. Confidentiality of information transmitted this way cannot be assured and interception by third-parties is possible. Phone and fax communication are considered more secure, but due to their convenience we offer electronic communication as well.

I give my consent to transmit the following health information:

- Appointments
- Billing and Payment
- Forms
- Health Records

By the following non-secure form:

- Unsecured email Email Address: _____
- Text Message Cell Phone: _____
